Happenings

Final Week

Shibboleth will finally replace ISIS this Sunday. If you are still not using Shibboleth, we urge you to please migrate asap. We are here to help you, but there is almost no time left.

Follow Up to Last Week's Conference

Thank you all for coming. [Click here](#) to see resources mentioned at the meeting. If you have any questions, please [contact us](#).

IAMUCLA At Your Service

Please migrate your applications to Shibboleth if you have not already done so. ISIS will not be supported soon.

Even though the stimulus package is finished, we are still here to help you migrate. We are taking appointments for you to come into Murphy Hall with your materials so that we can personally help you configure your Service Provider in a one-on-one scenario. This will allow us to give you our undivided attention, putting you on the fast track towards completion.
