

Service Provider Integration with UCTrust

This page lists SPs configured for cross-campus SSO (SAML) integration at UC.

For instructions on adding new applications to this list and tracking status of integrations, see [Procedure for On-Boarding New SPs](#).

Service Provider Integration Status

x: 2/15/2013 - UC Online requested an alternate SP configuration due to the vendor's non-compliance with InCommon certificate requirements. The new SP is bilateral with UCLA. It is no longer a UC Trust SP.

1: UCSF releases basic attributes (lived first, last, full and display names, email address, eduPersonPrincipalName, eduPersonAffiliation, eduPersonPrimaryAffiliation and eduPersonScopedAffiliation) for employees and affiliates to all InCommon participants. For students, the same attributes are released except for email. Email is restricted unless they use the self-service feature to updates their profile on the directory.ucsf.edu web site to make their email no longer private. Graduate Medical Education program Residents and Fellows data (a subset of students) are not automatically released. Release of their data must be specifically requested from and approved by the Director of the GME program at UCSF.
