

# SignetWorkGroupCall20081024

Signet Work Group Call Oct 10th 2008

## Meeting Notes

- At start of call about 15-20 people
- Next steps for Signet until end of year
  - hooks and plugin are pretty much done
  - they were going to begin webservice part now
  - do as much as they can until they can't do anything anymore
  - integrate with co manage? ppl want this?
  - ppl feel that without a co manage wrapper signet is not useful
  - Tom said if Signet code base is needed it might be reused
  - Not sure who but someone said that they will still work part time on Signet even after funding and all support won't be gone
  - some sort of integrated interface?
- Grouper integration with Signet
  - haven't really thought it throughly besides structure of code
- Signet with ldap
  - with ldap you have to query for data and modify data for it to work
  - want a yes/no answer back like grouper
- What happens when funding stops
  - not sure yet
  - everything will remain/internet2 will continue to host it
  - Need people to commit and project might continue
- action items
  - webservice interface
  - integrate eddy
  - hooks/plugin example
  - alberts use case
