

UCTrust Work Group Work Plan - 2009

UCTrust Work Group Work Plan - 2009

Issues for Consideration by the Entire Group

- Provisioning applications
 - Includes authentication for non-web applications
 - Should we require UCTrust SPs to provide web services for provisioning?
- Recommended UCTrust identifiers and attributes
- Group management
- [InCommon](#) Silver / UCTrust Basic convergence
- Library use cases

Issues to Be Addressed by a Subgroup

- Shibboleth 2.0 (Can we push [InCommon](#) to allow an extra 2.0 IdP per institution?)
- Documentation for (and by) service providers

Issues to be Addressed by Another ITLC Group with UCTrust Participation

- UC Grid integration
- Kualu KIM integration

Issues That Will Not Be Addressed in 2009

- Multi-factor authentication
