

UCTrust Wireless Agenda - 2010-07-12

UCTrust Wireless Agenda - 2010-07-12

Date and Time: **July 7, 2010, 1:30-2:30**

Dial-in number: **866-740-1260**

Web URL: <http://www.readytalk.com>

Access Code (voice and web): **7529390**

Agenda

- [Why Not Eduroam?](#)
- Authentication and Authorization
 - How soon will "member" affiliation be ready from [IdPs](#)? Should we consider not requiring it if it takes too long?
 - What if an IdP does not assert name or email? Should access be denied?
- Network Accessibility to [IdPs](#) before Authentication
 - Does the [InCommon](#) metadata suffice to determine all addresses that must be accessible?
- Project Plan
 - What are the tasks? Is anything missing from the following?
 - Wireless providers
 - Integrate Shibboleth into web portals as a new SP.
 - Work with campus IdP to register the SP with [InCommon](#) and UCTrust.
 - Implement access to [IdPs](#) for unauthenticated wireless users.
 - Identity providers
 - Implement "member" affiliation.
 - If [InCommon](#) metadata does not suffice, provide IP addresses that must be accessible as [UCTrust metadata](#).
 - Release attribute to wireless SPs, as they are deployed.
 - UCTrust metadata people
 - If [InCommon](#) metadata does not suffice, define a file format and add it to the [InCommon](#) metadata.
 - What is our time line?
 - Do we need resources?
